In-person with biography

Presented by
Steve Wilson

Tuesday 15 April 2025

Venue: Palestra Building, 197 Blackfriars Road, London SE1 8NJ

Commencing at 5:30pm BST

Talk synopsis

The largest part of London Underground is not in fact - underground. How does LU cope with conditions of ice, snow, fog, leaf-fall and the other difficulties of operating a surface railway in wintertime?

Steve will outline the a range of procedures utilised to keep London's transport network operational in all weathers.

Speaker biography

Steve's first role at London Underground was as Control Equipment Engineer in the Rolling Stock department - part of Professional Services Group - based at Acton Works.
